180° optical pattern models are optimized for a 45° mounting angle Part numbers listed in the above table are cool white. For neutral white models replace the first $\underline{\mathbf{C}}$ in the part code with an $\underline{\mathbf{N}}$ Ex: HZA2 $\underline{\mathbf{C}}$ 2N becomes HZA2 $\underline{\mathbf{N}}$ 2N When changing to neutral white there is an approximate 7% drop in lumen output
